

OHIO STREET / OHIO COURT / SHORT STREET - STREET RESURFACING PROJECT

Construction Notice #1

June 20, 2023

This notice is to inform you that the Ohio Street / Ohio Court / Short Street resurfacing project will begin performing roadway replacement activities this week beginning on Thursday, June 22nd. The existing roadway will be milled down 3 inches to the base course. Driving surfaces will be rough until the first layer of asphalt is installed (weather pending) on Wednesday, June 28th.

During the milling and paving operations there will be a local traffic detour in place. Ohio Street from Academy Drive to University Lane will be open to **Local Traffic Only** (shaded in orange below). Any motorists that do not need to access businesses in the closure will be detoured around the northern leg of the neighborhood to Ohio Court. Outside of the closure, flaggers will manage traffic per IDOT standards. Within the closure, motorists will be able to access properties with flagger assistance. Please approach the closure with caution and ensure construction personnel are aware you have entered the closure.

If you should have any questions regarding the Ohio Street / Ohio Court / Short Street resurfacing project, please contact:

Zachary Jaydos, Project Manager
Thomas Engineering Group, LLC
